

Task

Problem

Given an integer, **n**, and **n** space-separated integers as input, create a tuple, **t**, of those **n** integers. Then compute and print the result of **hash(t)**.

Note: **hash()** is one of the functions in the **__builtins__** module, so it need not be imported.

Input Format

Submissions

The first line contains an integer, **n**, denoting the number of elements in the tuple.

The second line contains **n** space-separated integers describing the elements in tuple **t**.

Output Format

Leaderboard

Print the result of **hash(t)**.
