

## Problem

Given the participants' score sheet for your University Sports Day, you are required to find the runner-up score. You are given  $n$  scores. Store them in a list and find the score of the runner-up.

## Input Format

The first line contains  $n$ . The second line contains an array  $A[]$  of  $n$  integers each separated by a space.

## Constraints

- $2 \leq n \leq 10$
- $-100 \leq A[i] \leq 100$

## Output Format

Print the runner-up score.

## Sample Input 0

```
5
2 3 6 6 5
```

## Sample Output 0

```
5
```

## Explanation 0

Given list is `[2, 3, 6, 6, 5]`. The maximum score is `6`, second maximum is `5`. Hence, we print `5` as the runner-up score.
