Tutorial

Check the [Tutorial](#) tab to know learn about division operators.

Task

The provided code stub reads two integers, **a** and **b**, from STDIN.

Add logic to print two lines. The first line should contain the result of integer division, **a // b**. The second line should contain the result of float division, **a / b**.

No rounding or formatting is necessary.

Example

- a = 3**
- b = 5**
- The result of the integer division **3//5 = 0**.
 - The result of the float division is **3/5 = 0.6**.

Print:

0
0.6

Input Format

The first line contains the first integer, **a**.

The second line contains the second integer, **b**.

Output Format

Print the two lines as described above.
