

Problem

Check [Tutorial](#) tab to know how to solve.

The included code stub will read an integer, n , from STDIN.
Without using any string methods, try to print the following:

$123 \dots n$

Note that " \dots " represents the consecutive values in between.

Example

$n = 5$

Print the string **12345**.

Input Format

The first line contains an integer n .

Constraints

$1 \leq n \leq 150$

Output Format

Print the list of integers from **1** through n as a string, without spaces.

Sample Input 0

3

Sample Output 0

123
